EXPERIENCE

Real Estate Research Center at Texas A&M University, Graduate Research Assistant September 2016 –

- Develop economic and statistical models and research for Texas housing markets, with particular emphasis on housing affordability. Manage research and analysis for special case studies on housing affordability conducted on behalf of cities and nonprofit organizations across Texas. Communicate research findings through written reports, articles, and presentations to constituents, public and private entities, and nonprofit organizations throughout Texas.

Texas A&M University, Graduate Research Assistant Spring – Fall 2020

- Served as Project Assistant for the Jacksonville Housing Needs Assessment, a comprehensive report on housing in Jacksonville, TX. Responsible for producing economic and statistical analysis and written content and facilitating communication with stakeholders. Communicated research findings to the City of Jacksonville through a written report and two presentations.

Texas A&M University, Teaching Assistant Spring 2020

- Coordinated lectures, assignments, and grading for nine Masters students. Produced audio and visual content for remote learning.

National Science Foundation, Co-Investigator, Quick Response Grant Spring 2019

Reconstruction or Relocation? Mobility Decisions of Homeowners Exposed to Recurrent Disasters

- Conducted semi-structured interviews with 15 homeowners in Lumberton, NC who received FEMA assistance for property elevation, reconstruction, or acquisition following Hurricane Matthew (2016). Communicated research findings through a written report and conference presentations.

Texas A&M University, Graduate Research Assistant Spring 2019

- Developed survey instrument for a multi-year research project assessing the impacts of housing and community environments on residents' physical activity, health, and cost of living. Project received grant funding from the T3 (Triads for Transformation) program.

Aquila Commercial, Research Intern January – August 2016

- Created cloud-based sales-comparable database, designed user interface, and enhanced search functionality and feedback. Produced written content and statistical analysis for quarterly commercial reports.
